10/01/2025 - 10/04/2025

Completed a front-end development internship at Ramraj Technology, building responsive user interfaces using HTML, CSS, and JavaScript.

PROJECTS

• Fake Social Media Profile Detection

Tech Stack: Python, React.js, Gemini API, Instaloader, Deno, REST API, Machine Learning

Role: Team Leader | API Integration & Backend

Developed a web system to detect fake Instagram profiles using AI-driven analysis. Extracted profile data with Python and Instaloader, integrated Gemini AI for behavior analysis, and built a React frontend with a Deno backend. Implemented detection based on follower ratios, post consistency, and bio authenticity, while managing API documentation and third-party integrations.

• YourLogo.com

Developed a responsive single-page application using React and Vite as a boilerplate for future scalable frontend projects.

Set up ESLint for code quality and consistency, and configured project structure following modern development standards.

Deployed the application on Vercel for fast and seamless access, enabling live preview and continuous updates.
